

Additional Troubleshooting When Installing Your Massimo Electric EV-Charger

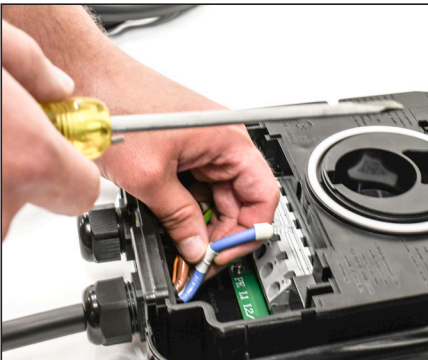

HOW TO CONNECT THE COMPRESSION COUPLING

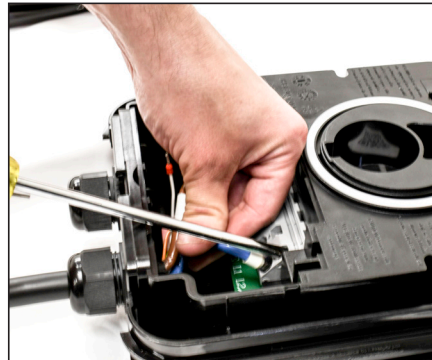

- STEP 1: Unscrew the compression coupling from the unit.
- STEP 2: Slide the compression coupling onto the main wire housing.
- STEP 4: Insert the main wire housing into slot.
- STEP 3: Screw the compression coupling together.

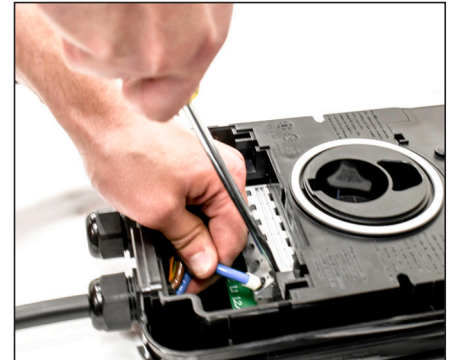

HOW TO CONNECT WIRES IN PORTS

- STEP 1: Get a flat-head screwdriver and the wire in place.

- STEP 2: Place the screwdriver in the top panel hole and place the wire in position below.

- STEP 2: Using the screwdriver, push down on the release mechanism, opening the wire port and insert the wire. Release pressure from the screwdriver to lock the wire in place.

ADDITIONAL NOTES:

- The EV-Charger App is not required to operate the system.
- Charger power will vary based on supplied power range.
- Please wait 15-30 seconds after powering on for full functionality.
